About This Game

Chicken VR is a virtual reality first person chicken simulator. The play area contains a coop and a small house. You are able to eat and drink by sticking your beak into the bowls. By pressing the trigger on the HTC vive controller, you are able to lay eggs inside the coop. Using your thumb on the trackpad, you can point your controller and teleport around, finding all of the easter eggs on the map.

Created, Produced, and Published by LB Studios

Title: Chicken VR
Genre: Simulation
