About This Content

Inspired by the grisly shootouts from Max's past, the Painful Memories Pack brings four new maps to Max Payne 3 multiplayer. Revisit the subway bloodbath from the original Max Payne in the Roscoe Street Subway map. Flashback to the dingy Hoboken watering-hole in the Marty's Bar map, open fire on the posh Branco family yacht in the Shoot First map or wage Gang Wars in the Canal De Panamá map. The pack also includes the IMG 5.56 and UAR-21 assault rifles, new avatars, three items and the Hangover Burst, causing enemies to respawn with blurred vision, reduced stamina and health.

max payne 3 painful memories pack

it is absolutely favorite faction. this really well done like all the other dlc. With new updates its better. with limited vr titles its not a bad one but I'd suggest some other titles first. Worth every penny spent.

. Awesome, its a new Playstation Home. Very much work in progress, can't say more at this point.. Bought the game the day or so it came out, but only finally found the time to play it very recently. Fantastic characters and humor that actually was some of the best I have ever seen in a game. Great job Crankage, I will totally try out whatever else you make.. Some of the movement can be awkward, but overall a fun game.

i think they got bored and released it when it wasn't even finished yet. she is clearly made only to make sisters of sigmar a little more even with everyone else because yeah the sisters cannot already beat people without ranged weapons, doh this class is still featuring melee it just looks and works as a ranged player with a sisters of sigmar strength.

But she has no deal to do with them, besides work for them but this seems like this should have been added as loan deal and free, and then made an dlc feature to one of the races.

Her design is lazy, 1 hat features colors for the feathers, 1 shirt, 2 arm designs not featuring anything new looking lazy, the pants was taken hero class design of the human, lazy.

Why this is not a free update since she is clearly all loaned from other faction, which the hero loan system should feature already lol, and don't come and say things like: "but it's named smugglers, duh". it's lazy and should have been free lol make something cooler :P

The globe rat is at least an actual class from the rats, and he was needed to make their ranged playstyle give them more benefit since the direct combat leads them to be slaughtered.. Is this it? One 300 turn game with 1 map, you start at the same location every time, the only thing that is different is the difficulty. I get that Egypt is a real place so you can't have randomly generated maps but still. Memphis is the only region I can even see. The end of my first game I lost everything in the last 10 turns "because history". I liked the game until I tried to replay it and I realized that there was no replayability. Can you even play a game longer than 300 turns?. Terrifying as hell. I had so much streaming and playing this with my friends.. I'd say Rogue Lycan's review is pretty well grounded and constructive in pointing out the pros and cons of the game.

I really enjoyed the top down game play segments, being a fan of dungeon crawlers it felt like a more casual approach to the genre but also changes it up with an interesting one on one combat which keeps you from mindlessly pressing buttons.

There's nothing I can say that hasn't already been said for the soundtrack and voice overs, they are great and helped draw me more into the story while enjoying the art.

I do think controller support would have been nice but given the feel of this type of game it doesn't really need it to be enjoyable; since it's not a hardcore experience like street fighter or tekken.

Overall I felt the game was worthwhile if not for the voice acting and music alone and would recommend giving it a try.
